Field Operations Lead-GTA

Description

About the Company

At Cablewave Utility Services, we specialize in delivering comprehensive utility engineering and damage prevention services tailored for the telecommunications and electrical sectors. Our expertise encompasses utility pole and Subsurface Utility Engineering, coupled with efficient utility record management. Join us as we overcome the digital divide!

Our Values

- Safety First – We prioritize and promote the safety of our employees and extend this commitment to those around us.
- Customer Dedication – We are devoted to fulfilling our customer commitments by completing projects on time, within budget, and in accordance with client's specifications.
- Authenticity – We embody honesty, respect, and helpfulness in our interactions with each other, our clients, and the community.
- Work Ethic and Celebration – Embracing a "Work Hard / Play Hard" ethos, we strive to put forth our best efforts every day and celebrate the victories together.
- Unwavering Dedication – We remain steadfast in our dedication to achieving our goals, upholding our values, and honoring our commitments.

About the role:

The position of a Field Operations Lead places a paramount focus on ensuring the safety of both workers and infrastructure assets. We are in search of a dynamic and ambitious candidate who is enthusiastic about advancing in their professional journey and furthering their career within the utility sector. A minimum of 3 years of experience in completing public locates and successful completion of the Damage Prevention Technician program by ORCGA or an equivalent 6 weeks of in-class training are prerequisites for this role. The primary responsibilities of this crucial role include leading our field technicians through training, providing support, and fostering the ongoing development of our core services.

The role will have its primary location in the Greater Toronto Area, involving extensive daily travel, accounting for approximately 95% of the time. Additionally, there may be occasional requirements for extended periods of travel away from home for 2 to 3 days on a semi-monthly basis.

Responsibilities

Typical Duties & Responsibilities of this role:

The primary duties of the candidate include conducting public and private utility locates, performing field surveys, and contributing to the advancement of training and safety programs. The required skill set and processes for this role involve utilizing Electromagnetic (EM) induction equipment and ground-penetrating radar to complete utility locates. Proficiency in operating survey-grade GPS, with experience with Microsurvey considered an asset, is essential for capturing information on existing infrastructure and above-grade equipment. Additionally, the candidate will conduct utility pole surveys, which entail gathering detailed information on existing conductors, cables and equipment.

Qualifications

Experience and Qualifications:

Hiring organization

Cablewave Utility Services
